Daily Trips and Precipitation

● Precipitation (mm) ● Trips

This chart displays the relationship between daily precipitation and the number of trips over a three-month period. The left y-axis measures precipitation in millimeters (0 to 40), and the right y-axis measures the number of trips (0 to 150K+). Precipitation is represented by a blue line and a corresponding shaded area, while the number of trips is shown as a dark blue line. The x-axis spans from February to April 2025, with a timeline slider at the bottom.

Month	Precipitation (mm)	Trips
Feb 2025	~10	~120K
Mar 2025	~35	~140K
Apr 2025	~40	~130K

Average Trips per Hour: Wet vs Dry

● Weekday ● Weekend

This bar chart compares the average number of trips per hour during periods of precipitation versus no precipitation. The y-axis represents the number of trips in thousands (0K to 6K+). Blue bars represent weekdays, and dark blue bars represent weekends.

Category	Weekday (K)	Weekend (K)
Precipitation	6.6K	6.4K
No precipitation	5.3K	5.4K

Trips in Precipitation vs Dry Hours (%)

● Weekday ● Weekend

This line chart shows the percentage of trips that occur during precipitation hours (0 to 24 hours of the day) for weekdays and weekends. The y-axis represents the percentage from -20% to 40%. Blue lines represent weekdays, and dark blue lines represent weekends.

Hour of Day	Weekday (%)	Weekend (%)
0	~15%	~5%
5	~20%	~-15%
10	~15%	~15%
15	~10%	~10%
20	~15%	~25%
24	~15%	~-30%
